PROFESSIONAL SUMMARY

Motivated B.Tech Information Technology student at Toc H Institute of Science and Technology with a strong foundation in Python, Web Development, and Cybersecurity basics. Proven track record in building and deploying AI-driven web applications and responsive interfaces. Eager to leverage technical problem-solving skills in a challenging internship or project-based role.

EDUCATION

B.Tech in Information Technology | Toc H Institute of Science and Technology, Arakunnam *2025 – 2029*

Class XII | SDPY GHSS — 85.25%

Class X | St. Xavier's Public School — 86.4%

INTERNSHIP EXPERIENCE

AI-Powered Full Stack & Intelligent Application Development Intern | Lifosys Digital Systems *June 2026 – July 2026*

Remote

- Developed a prototype of ExamGuard, a smart exam invigilation application, as part of an AI-powered full stack development internship.

TECHNICAL SKILLS

Programming Languages: Python, C

Web Development: HTML, CSS, JavaScript

Tools & Platforms: Git, GitHub, Hugging Face Spaces

Core Competencies: Cybersecurity Basics, AI/ML Concepts, Problem Solving

PROJECTS

MediCore *Web Development, Render*

- Designed and developed a full-stack web application for healthcare management, focusing on a clean and intuitive user experience.
- Deployed the application on Render, making it publicly accessible as a live working demo.

Live Demo: https://medicore-1-4hd6.onrender.com

BiteSync *Web Development, Render*

- Built a responsive full-stack web application to simplify and streamline food ordering and management.
- Deployed the application on Render, making it publicly accessible as a live working demo.

Live Demo: https://bitesync-iecm.onrender.com

ExamGuard (Prototype) *Python, AI/ML, Web Development*

- Developing an AI-based proctoring system designed to enhance the integrity of online assessments through real-time monitoring.
- Currently in the prototyping phase, focusing on core logic and architectural design for secure environment analysis.

Project URL: https://sreya1629.github.io/ExamGuard/

Fake News Detector *Python, Machine Learning, Hugging Face*

- Engineered a machine-learning-based web application to classify news articles as 'Real' or 'Fake'.
- Utilized Python libraries for data processing and deployed the model on Hugging Face Spaces for real-time inference.

Live Demo: https://sreya1629-fake-news-detector.hf.space

Personal Portfolio Website *HTML, CSS, JavaScript, GitHub Pages*

- Designed and developed a fully responsive personal portfolio to showcase technical projects, skills, and professional information.

- Implemented version control via Git and maintained accessibility via GitHub Pages hosting.

Portfolio: https://Sreya1629.github.io

SOFT SKILLS

Communication, Teamwork, Leadership, Time Management, Adaptability

LANGUAGES

English, Malayalam

AREAS OF INTEREST

Cybersecurity, Artificial Intelligence, Web Development, UI/UX Development, Technology Innovation
